MEDUSA'S PUZZLE

★★★★☆ DIFFICULTY LEVEL

A Mythic Challenge

Dare to face the ancient enigma of Medusa! Legend tells that her gaze can turn even the bravest to stone. In this puzzle, your task is to fit every piece perfectly within the grid, encircling the colored orbs and sealing off Medusa's deadly stare. Can you solve the mystery and escape her petrifying gaze, or will you too be turned to stone...?

ODYSSEY'S QUEST

DIFFICULTY LEVEL

Can you slide both trays out?

The delicate balance between the right and left trays demands strategic moves. Shifting the pins may liberate one tray momentarily, only to obstruct the other. Discover the solution to gracefully extract the trays, and once conquered, return them to their original positions.

DOUBLE TROUBLE

DIFFICULTY LEVEL

A maze? A puzzle? Why not both!

With Two mazes, two balls, everything connected by giant gears. On their own, each maze is manageable. Can you find the way to remove both balls from the mazes simultaneously, though? Careful! The gears move at the same time, so a step towards the exit on one side may be a step backwards on the other.

BRAIN PUZZLE №3 TEMPORAL LOBE

DIFFICULTY LEVEL

Key Words: Memory, Emotions, Language

One of many parts of the brain, the temporal lobe makes memories and associated emotions. And without the temporal lobe, we couldn't make the words to explain our thoughts (or puzzles) to others. Use your memories of puzzles past to solve!

Match!

Match requires a sharp mind and quick reflexes.
With two identical sets of eighteen playing cards, you'll have plenty of chances to find matches. Better think fast, though – with Match, all players search for matches at the same time.

Pair!

Test your memory to the max!
This seemingly simple game goes one step further. Merely eight identical pairs of square tiles to match must be child's play...right?

DYNACUBE

For your inner fidgeter!

Long queues, waiting rooms...the clock ticks and tocks forever. Good thing you brought your Dynacube!

EQUAL 7

DIFFICULTY LEVEL

Rule your roll

Luck won't help you with this puzzle – but you might wish it would! Equal7 is a mathematical masterpiece with two different challenges, each a different level of difficulty. Tilt the cube and slide the dice to and fro, until all the dots on each side equal the same number – 10, 11, and 12 are all possible combinations, with more than one way to get there. Once you've conquered those combinations, the real test is getting to seven – Equal7! Once you've solved it, present your achievement on its own built-in pedestal. Now the puzzle is your trophy!
